(54) Title: DATA SEARCHING METHOD AND INFORMATION DATA SCRAPPING METHOD USING INTERNET

(57) Abstract: A data search method comprises a search condition input step inputting search condition through a user terminal connected to an electric communication network; and a batch processing search step for performing search in a batch processing, wherein the batch processing step includes: a transmission subroutine for transmitting the search condition to one or more database servers having search engines through the electric communication network, a first reception subroutine for receiving one or more search condition through the electric communication network, and a second reception subroutine for receiving data associated with the search results through the electric communication network.
